The Builder, assembled

Keystone / Proposed identity / October 2026

Repo Creator

A two-part R gives Repo Creator a clear initial and a construction story.

The upper-right corner feels like a component finding its place. Its chamfer repeats the angle of the lower leg. A visible seam keeps that assembly readable in a single colour. The warm accent adds personality without changing the silhouette.

The identity palette stays fixed when users choose different interface accents.

Colour

A quiet foundation with one warm component

Ink

#202B33

Primary text and dark surfaces

Paper

#F6F2E9

Light surfaces and reversed marks

Clay

#E87B40

The corner piece and small accents

Slate

#58646B

Secondary text on Paper

Ink on Paper: 12.92:1. Paper on Ink: 12.92:1. Slate on Paper: 5.45:1.

Use Clay for artwork. Clay on Paper is 2.56:1, so use Ink for normal text.

White #FFFFFF is available for strict monochrome exports. Avoid gradients.

Typography

Manrope gives the angular mark a friendly, precise companion

Repo Creator

The wordmark uses Manrope Bold 700 with the supplied spacing.

A good place to start building.

Headlines: Bold 700. Supporting copy: Medium 500.

Keep the product name as Repo Creator, with a space and initial capitals.

Outlined SVGs render without fonts. The live-text source and variable font are included for editing. Manrope carries the SIL Open Font License 1.1.

Spacing and size

Keep the construction visible

8-unit clear space

Visible mark: 52 x 48 units

Minimum clear space: 8 units

(one-sixth of visible mark height)

Repo Creator

Use the supplied lockup proportions and spacing.

Minimum digital width: 188 px for the primary logo.

Standalone wordmark: 146 px. Mark: 16 px artboard.

Below these sizes, use the mark instead of lettering.

For print, keep mark artboard at least 5 mm wide and the primary lockup at least 35 mm wide.

Usage and handoff

Production artwork, ready for review

Use supplied colour or monochrome variants

Preserve	The seam, chamfer, proportions and original two-piece relationship.
Backgrounds	Use light artwork on dark surfaces. Keep Clay as a secondary colour.
Avoid	Stretching, rotation, gradients, shadows, outlines or extra pieces.
Application icons	Use platform candidates in icons/. They include a Paper tile for contrast.
Media	Use the 1600 x 560 README banner and 1280 x 640 social preview.
Approval	Artwork is proposed. App icon integration and README updates come later.
